

PENTA Engineering Group, Inc. (PENTA) provides our clients with a wide range of construction services.

Our multi-disciplined team of client-oriented professionals assists PENTA in providing an unparalleled evaluation of construction projects. PENTA's services include, but are not limited to, construction monitoring, contract administration, construction administration, and design/build.

These services are detailed below:

Construction Monitoring – PENTA's qualified professionals typically evaluate over \$100 million of construction progress annually throughout North America. Our assessment team consists of degreed and licensed mechanical, structural, and civil engineers with experience in commercial, educational, residential, and highway construction. PENTA's professionals can provide full-time or part-time construction monitoring in order to suit the needs of our clients. During the evaluation, PENTA's staff focuses on items that will affect the constructability, efficiency, accessibility, and sustainability of the individual building components. PENTA's professionals compare the information provided in construction documentation and observations made at the project sites to various industry standards. Our evaluation of each project is presented to the client in report format including an assessment of the project schedule, the project budget, and the quality of design documents or construction progress.

Contract/Construction Administration – PENTA'S professionals have experience in contract and construction administration for numerous types and sizes of projects. Our professionals can assist with the following:

Write or review the project specifications • Identify qualified contractors • Preside over the pre-bid meeting • Review submittals and shop drawings • Review request for information (RFI) • Analyze the bids • Award the contract • Conduct project meetings • Perform site visits and write field reports • Review applications for payment and change orders • Procurement of closeout documentation

Design/Build – PENTA's qualified professionals have extensive experience in designing and constructing projects for our clients. Our professionals are able to provide a client with insight into their particular project, design a solution, and then serve as the construction manager for the project. Our design/build team provides our clients with a single source for their projects from evaluation to design to construction. With PENTA as the designer and construction manager, we are fully involved with the project from start to finish. We develop the design, create the construction documents, hire subcontractors to perform the construction, and monitor the construction to ensure that the project is completed on time and on budget.

Our professional team of engineers is dedicated to meeting the needs of each individual client and can tailor a scope of services to meet those needs.
